

CIO Security Committee Meeting
May 10, 2006
Minutes

Members present: Greg Fay(DAS); Bernard Gaumer(JB); Lesa Quinn(DPD); Diane Thompson (IWD); John Wolf (IWD)

DAS Information Security Office Utility – Greg Fay reported on formation and funding of the ISO. Should be built into everyone's budget for 08 budget. Cost will be 95 cents per employee per month; these will include employees on active directory.

Greg reported that he is having two meetings – Monday May 15 and Thursday, May 18 to discuss services that each department would like to partake in, and this will enable his office to put a work plan together regarding services, audits, etc.

A minimum standard must be worked on in the future for connecting to the network.

Role of CIO Security Committee – bring concerns and new technology standards and innovative ideas to the CIO Security council.

Need to have standards to evaluate departments to become compliant with security policy in place.

Homeland Security gave money for Blade Firewalls and no one has taken advantage of this. This enables you to route traffic to the blade as a firewall solution. Please contact Dave Rowan ITE for further information.

Future topics:

Wireless Standard

Data transmitted under unsecured links.

Security connections to network.
